

Why Choose Us?

We are a Dental Practice that offers more than just dentistry !

Every dental practice sees more patients than an appointed GP as a patient is due to see their dentist twice a year sometimes even 4 times.

Dental Practices have an amazing opportunity to impact so many lives because they have a chance to not only to care for their patients' teeth, but also care for their total health.

We can offer patients a chance to lead a healthier life by showing you the connection of oral health and general health by providing Total Health Screens.

It's the process of offering patients the chance know their key health numbers which includes

Blood Pressure

Body Mass Index (BMI)

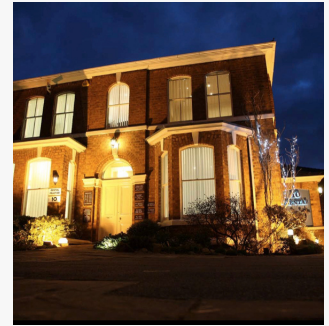

Waist & Height Ratio

Cholesterol Screen

Glucose Screen

Dental Practices Are In A Position To Educate

Beyond cleaner, healthier and cosmetically sound smiles, dental professionals can also provide patients with education on the oral systemic connection and offer preventative screenings for patients in areas of general health.

This gives our patients the chance to lead a healthier longer life and increases your healthcare services for your patients.
